**DETAILED ACTION**

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-39, drawn to a method of separating at least one target from a non-target substance in a sample comprising mixing the sample with magnetic particles to form a suspension; placing the suspension onto a substrate material; exposing the substrate material to a magnetic field; repeatedly applying a pre-determined increase in the magnetic field in a pulsing manner to cause the magnetic particles to separate spatially from the non-target material.

Group II, claim(s) 40-93, drawn to an apparatus comprising a coil which produces variable pulse magnetic fields; a substrate that includes magnetic mixture; a sample chamber located within the coil for receiving the sample.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: group I is a method of separating magnetic particles from a mixture by applying a pre-determined increase in the magnetic field in a pulsing manner. However, the coil of the apparatus in group II produces variable pulsed magnetic fields, not pre-determined increase of magnetic

fields. Therefore, these groups are not related. The method is a separation method by applying increased strength of magnetic fields while the apparatus is used for applying variable magnetic fields, not increasing magnetic fields.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
